

NCFE Level 2 Certificate In Care Planning

Care planning relates to addressing an individual's full range of needs whilst accounting for their circumstances and preferences. It helps individuals to become involved in decisions about their care and to achieve the outcomes they want. Care planning plays an important role in healthcare and creates a person-centred approach to care. This qualification will allow you to understand your role in supporting the preferences and needs of individuals in relation to their care and support. It also enables you to develop and implement care plans, and contribute to the review of these by observing, monitoring and reporting on the care activities you are responsible for.

This qualification is suitable for learners who are looking to enter into, or progress within, employment in a variety of sectors and job roles where an understanding of care planning is required. This qualification is suitable for learners aged 19 and above.

Course content:

This course is split into six manageable units:

Unit 1: Understanding person-centred thinking and planning

Unit 2: Care planning for the care worker

Unit 3: Understanding nutrition and hydration in health and social care settings

Unit 4: Principles of supporting an individual to maintain personal hygiene

Unit 5: Understanding continence care

Unit 6: Principles of supporting sleep

Each unit contains activities and assessments designed to cover the specific learning outcomes.
